ROOM

## TAILORED SOLUTIONS

At Pegasus Medical, we don't just provide products; we offer transformation. Meticulously designed vehicle solutions enhance workflow, maximize productivity, and ensure the smooth functioning of your sterilization department. Join us in shaping the future of workspace optimization.

In the Central Sterile Services Departments [CSSD] environment, precision and efficiency are non-negotiable. Our product line — which includes stationary and movable storage systems, tailored solutions, service carts, antimicrobial anesthesia carts, and a pioneering 'no-touch' method — is engineered to enhance CSSD functionality. We provide comprehensive solutions, from secure storage to streamlined transportation, to improve hygiene, reduce contamination risks, and optimize workflow. Elevate your CSSD standards with our innovative products, dedicated to ensuring the highest levels of safety and sterility in healthcare settings.

## KNOWLEDGE & EXPERTISE

Pegasus draws its strength from knowledge. With over 20 years dedicated to studying and understanding the needs of healthcare professionals, our solutions are born from a wealth of expertise. The user's needs serve as our guiding light, shaping innovations that empower and deliver excellence.

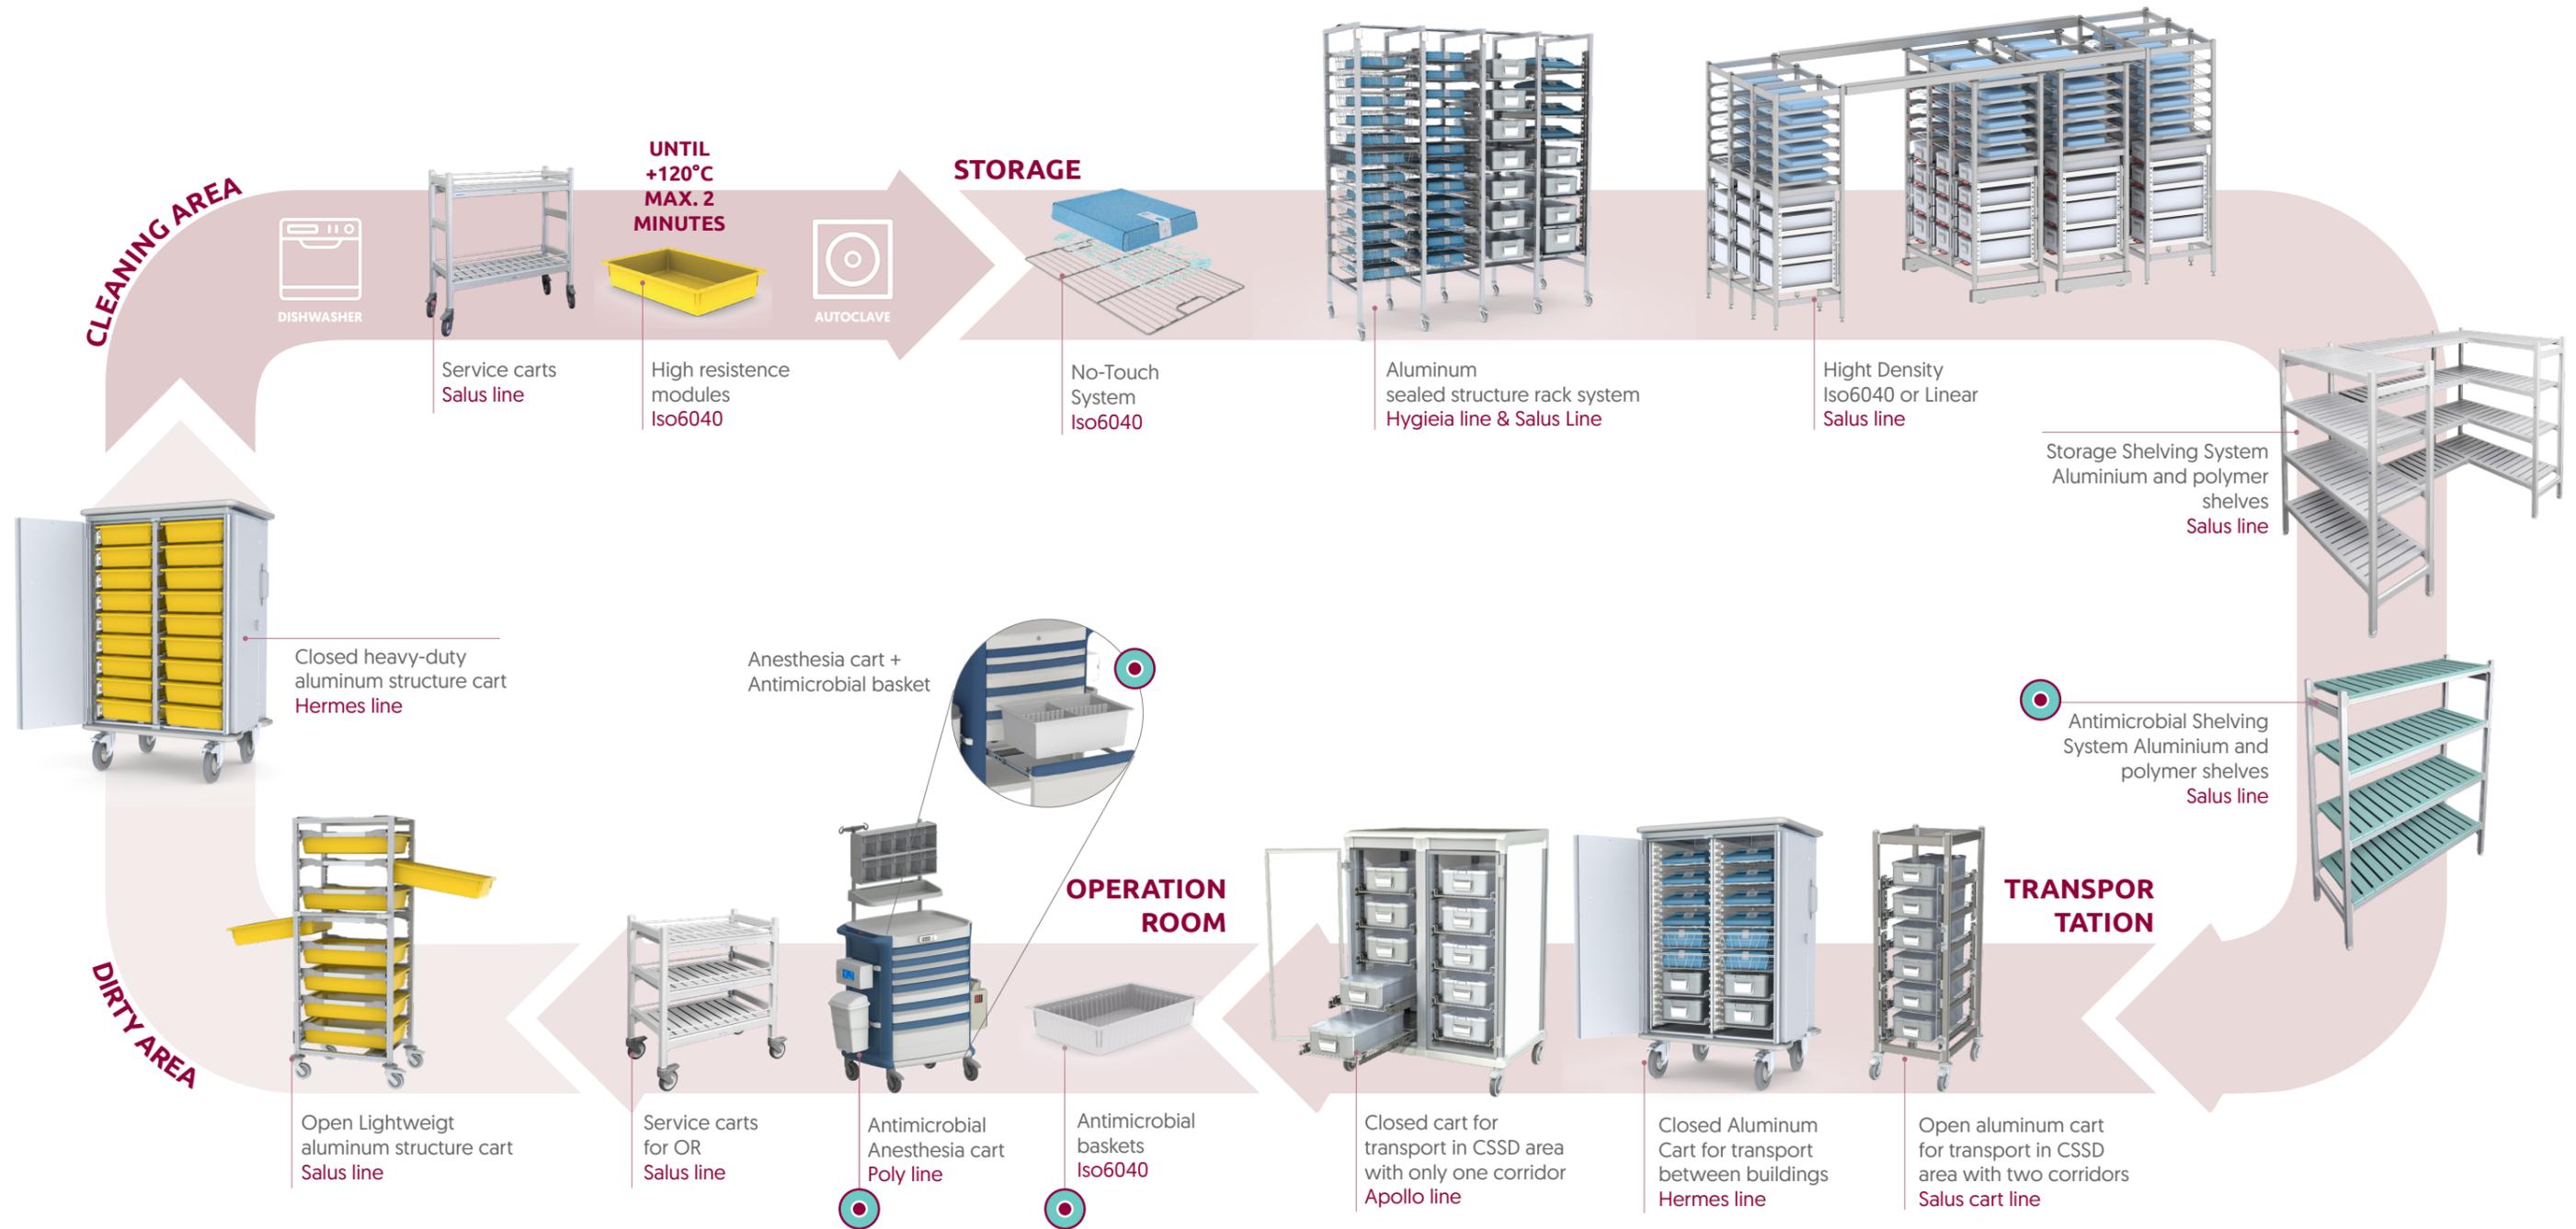

## PROJECTS ACROSS THE GLOBE

Dedicated to global efficiency in Central Sterile Services Departments [CSSD], our ongoing projects are actively simplifying operations worldwide. Our mission is clear: to streamline CSSD. Beyond innovative projects, we guide you in understanding logistics, recommend quality products, and provide tailored materials for this crucial hospital area. We're committed not just to delivering products but empowering you to optimize CSSD operations for enhanced efficiency and superior healthcare outcomes.

# FULL SOLUTION FOR CSSD AREA

Pegasus Medical offers a holistic solution for CSSD areas, encompassing the entire workflow. We curate the most advanced products available in the market to deliver a complete and advanced solution for your sterile area needs.

Products with antimicrobial technology

# THE POWER OF STATIONARY STORAGE

Welcome to the future of sterilization department efficiency!  
We have solutions for all your CSSD stationary storage need

## HYGIEIA

The Hygieia system boasts significant and unique advantages over market competitors: an airtight structure and user-friendly design

### ✓ AIRTIGHT STRUCTURE

Its sealed design alleviates concerns about liquid infiltration, allowing the entire system to be fully washed without the risk of rusting or water accumulation

### ✓ USER-FRIENDLY DESIGN

The Hygieia system enables easy rail adjustments for effortless customization, like using building blocks. This allows the medical team to modify the system easily without the need for technical expertise, ensuring adaptability to their storage requirements

### ✓ COMPETITIVE PRICES

With preset configurations and fixed sizes, our system simplifies selection and pricing—ideal for tenders and cost-effective medical storage solutions

\* Wheels for cleaning purposes only.  
Easier to move and clean under

## SALUS

Fully customized aluminum system for increased work efficiency. Product line perfect for projects

### ✓ WORK EFFICIENCY

Unlock up to 40% more storage space with the latest standards and work methods, enhancing both the ergonomic health of medical staff and equipment

### ✓ CUSTOM PROJECTS

It doesn't matter if you have windows or a problematic work space, our team of experts will come to the place, take measurements, list your storage needs and work environment and accordingly present you with a solution tailored to your needs.

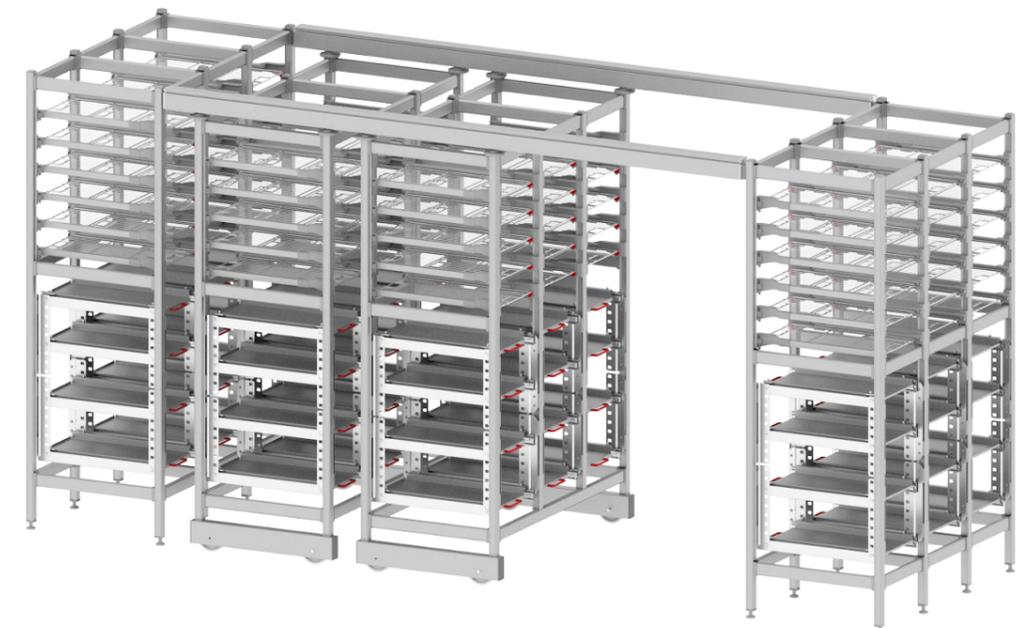

## SALUS HD (HIGH-DENSITY)

Aluminum system for areas with increased storage needs. Best for elongated spaces, maximizing utilization of the space

### ✓ 60% MORE STORAGE

### ✓ UPPER RAIL

- No platform rails hindering room disinfection
- No construction permits or floor drilling needed

# SEAMLESS TRANSPORTATION SOLUTIONS

After 20 years in the storage field, in 2016, we embarked on research and development, specifically focusing on hospital sterile floors. Through meticulous product development and market testing, we now offer a range of products designed to optimize your workspace, incorporating the most innovative work methods. Our sterilization product line is here to seamlessly serve all your transportation needs.

## DIRTY AEREA

Transport used instruments with ease and security. Bins with rounded corners make them easier to sterilize.

### Open Transportation Carts

#### SALUS

#### ✓ FAST TRANSPORT

Move between stationary units in areas in the same building

### Closed Transportation Carts

#### HERMES

#### ✓ HEAVY DUTY

Cart with bigger wheels, made for transport in between buildings of the same institution

## CLEANING AEREA

Our clean transportation units ensures that all sterile instruments keep their integrity from sterilization to the OR and any other areas

### Open Transportation Carts

#### SALUS

#### ✓ FAST TRANSPORT

Move between stationary units in areas in the same building

### Closed Transportation Carts

#### APOLLO

#### ✓ TRANSPORTATION & STORAGE

Can be used not only as transportation, but also as a mobile storage unit

#### HERMES

#### ✓ HEAVY DUTY

Cart with bigger wheels, made for transport in between buildings of the same institution
